ACKNOWLEDGEMENT

We are greatly indebted to our seminar guide **Ms kale J.S.** for her able guidance throughout this work. It has been an altogether different experience to work with her and we would like to thank her for her help, suggestions and numerous discussions.

We gladly take this opportunity to thank Dr. Rajurkar A. M. (Head of Computer Science & Engineering, MGM's College of Engineering, Nanded).

We are heartily thankful to Dr. Lathkar G. S. (Director, MGM's College of Engineering, Nanded) for providing facility during progress of seminar; also for her kindly help, guidance and inspiration.

Last but not least we are also thankful to all those who helped us directly or indirectly to develop this seminar and complete it successfully.

With Deep Reverence,

Ishwari Nandedkar

Nagarjun Tumma

ABSTRACT

The RecipeHub – Discover Amazing Recipes project is a modern, responsive web-based platform designed to help users explore, search, and discover a wide variety of recipes from around the world. It provides an intuitive interface that caters to both novice cooks and culinary experts, making cooking an engaging and accessible experience for all.

This project features a clean, visually appealing design with core functionalities such as a smart search engine, mobile-friendly layout, surprise recipe generator, and curated video tutorials. Users can browse recipes by ingredients, cuisine type, dietary preferences, or preparation time. Additionally, the platform promotes global cuisine diversity and community engagement by showcasing top-rated and tested recipes.

The RecipeHub project was built using HTML and CSS, focusing on user experience, ease of navigation, and aesthetic appeal. It aims to inspire users to try new dishes and make informed cooking choices through interactive and visually enriched content.
